-Database Administration

## PROFESSIONAL SUMMARY

Software Engineer with experience in development and maintaining applications with focus in reliability and scalability. Fascinated with learning and development of life changing solutions.

## EMPLOYMENT HISTORY

### Full Stack Software Developer, AA Kenya

October, 2024 – Present

This role pushed my capabilities further with the opportunity to work with large volumes of data to provide smooth operations in the organization as well as create systems that can integrate in client user patterns and behaviors from the ground up. I work on core data infrastructure, data privacy and security, front-end development with **Angular**, backend development with **GoLang** and collaborated with multiple developers to deliver core system and build amazing customer facing systems.

### Software Developer, Tion Precision Electronics

April, 2023 – August, 2024

Tasked with the development of an ERP system that is multi-tenant and modular with installable applications relative to subscription packages. I was also tasked with developing hardware to software integrations, payments integrations and third-party integrations the most prominent being transmission of weighing scale data to a web application via WIFI on real-time basis.

### Junior Software Developer, VertexHub Group Limited

January, 2022- November 2022

I was tasked with developing and maintaining a payment processing Service application built on Laravel as frontend and NestJS as backend.

The day-to-day activities involved:

- Adding modules, integrations to payment platforms and documenting API's.
- Deploying service updates and upgrades on a Linux server.
- PostgreSQL database administration.
- Minor Server management and configuration tasks.

### Intern Software Developer, VertexHub Group Limited

October, 2021 - December, 2021

- Development of an E-Commerce platform using Magento CMS.
- S.E.O optimization for the E-Commerce site.
- Website development.
- Computer maintenance(Troubleshooting and repair)

## **EDUCATION**

**Molo Academy, KCSE**

**Jan, 2013 - Dec, 2016**

## **KEY ATTRIBUTES**

- Self-Motivated and visionary
- Good analytical and deduction skills
- Excellent team player
- Work under no supervision
- Good at research
- Ready to learn new things and technologies
